

SeniorAgent Orchestrator

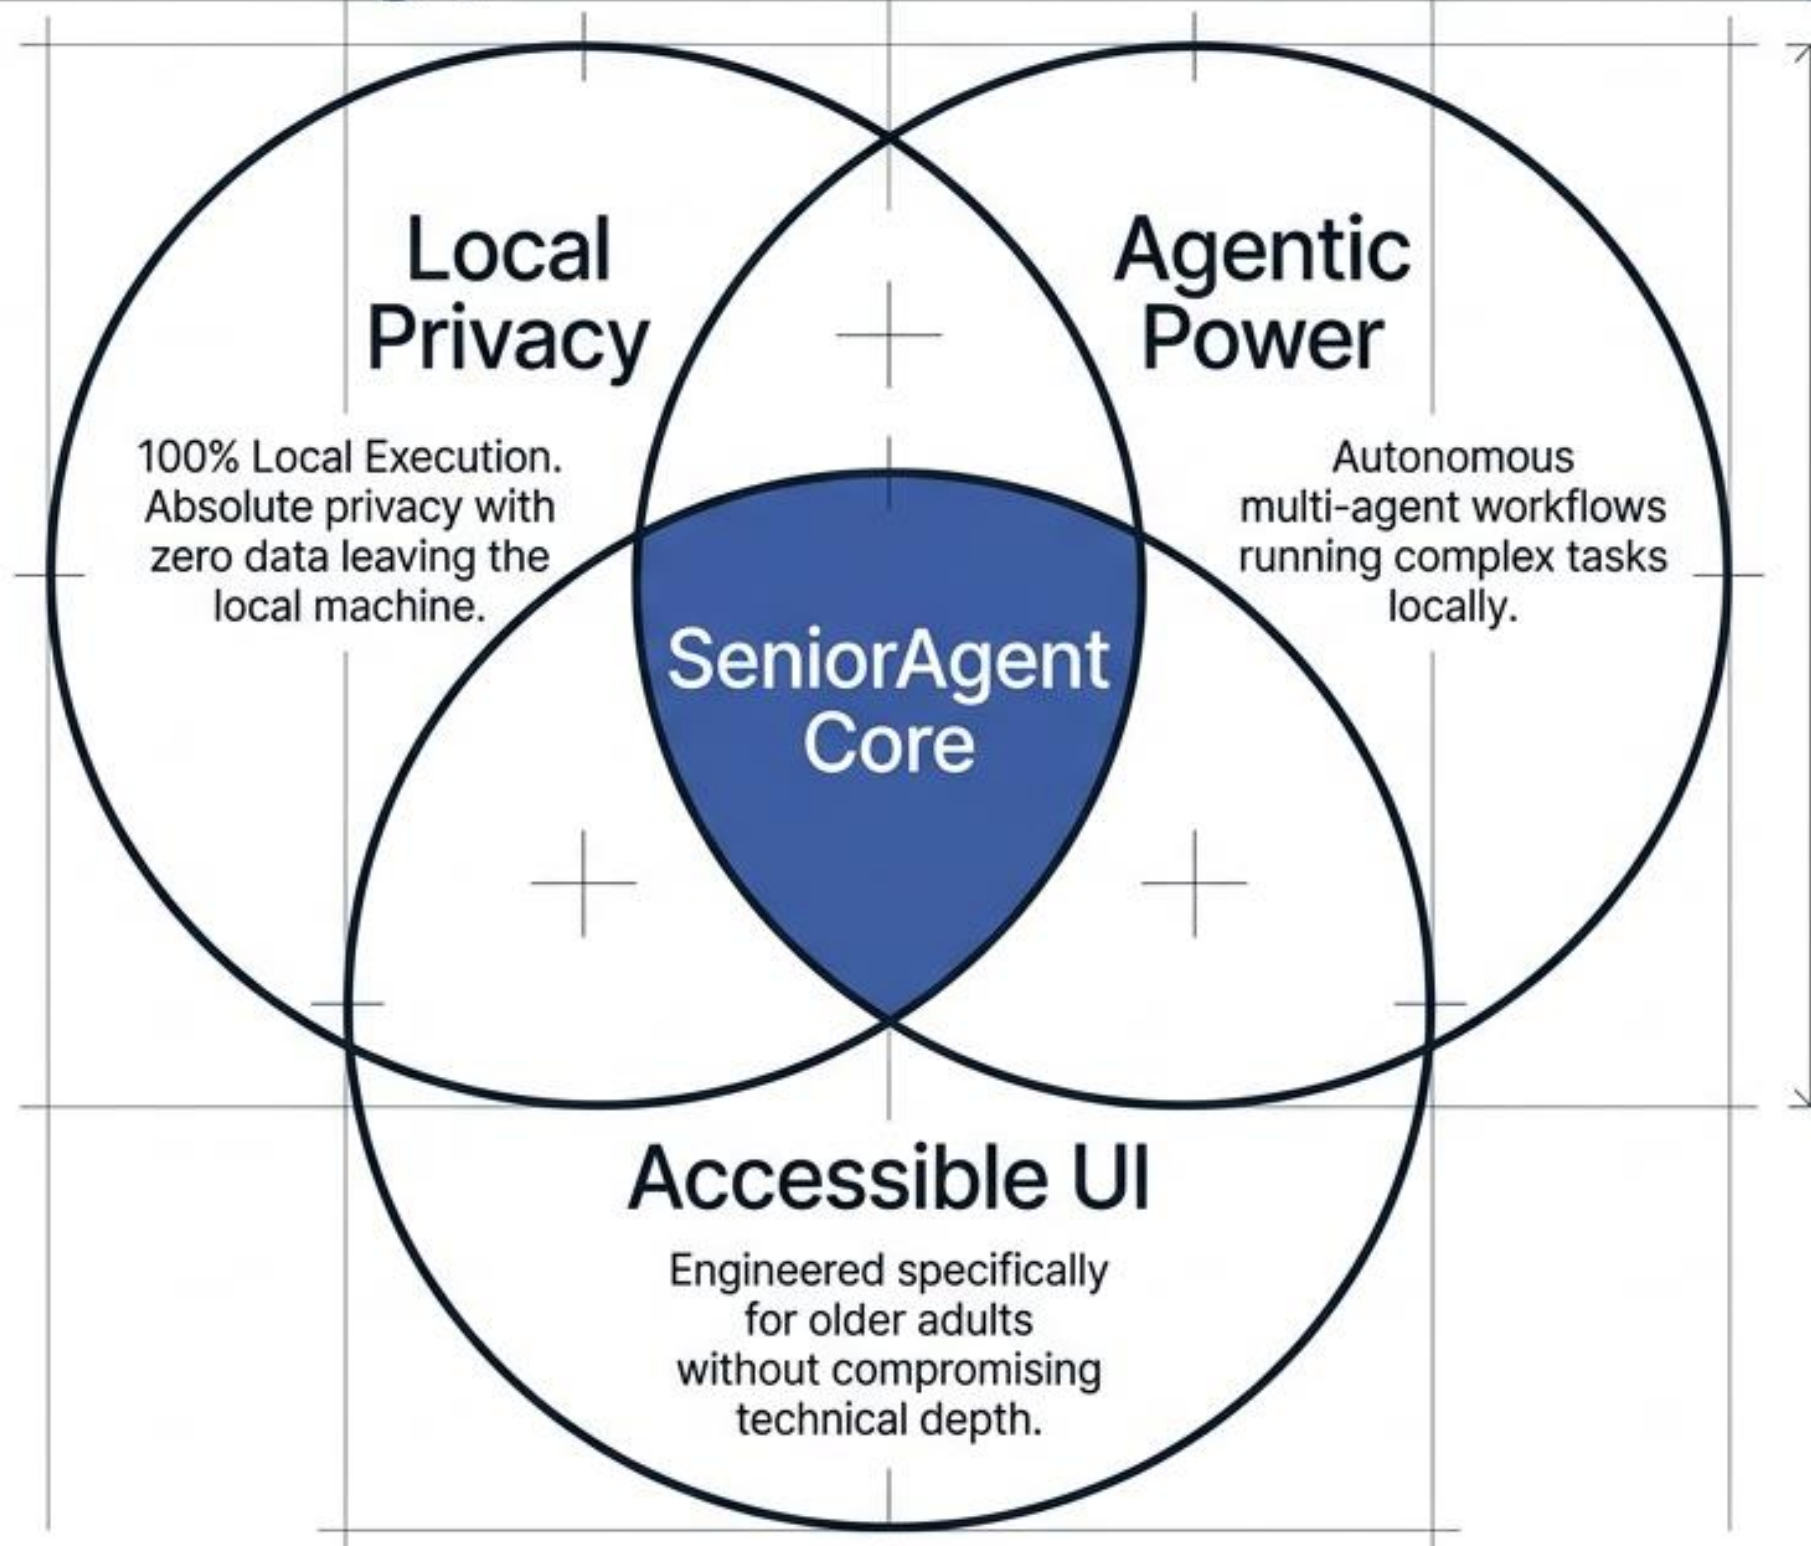

The Local-First Agentic OS

Bridging the gap between advanced multi-agent workflows and senior accessibility.

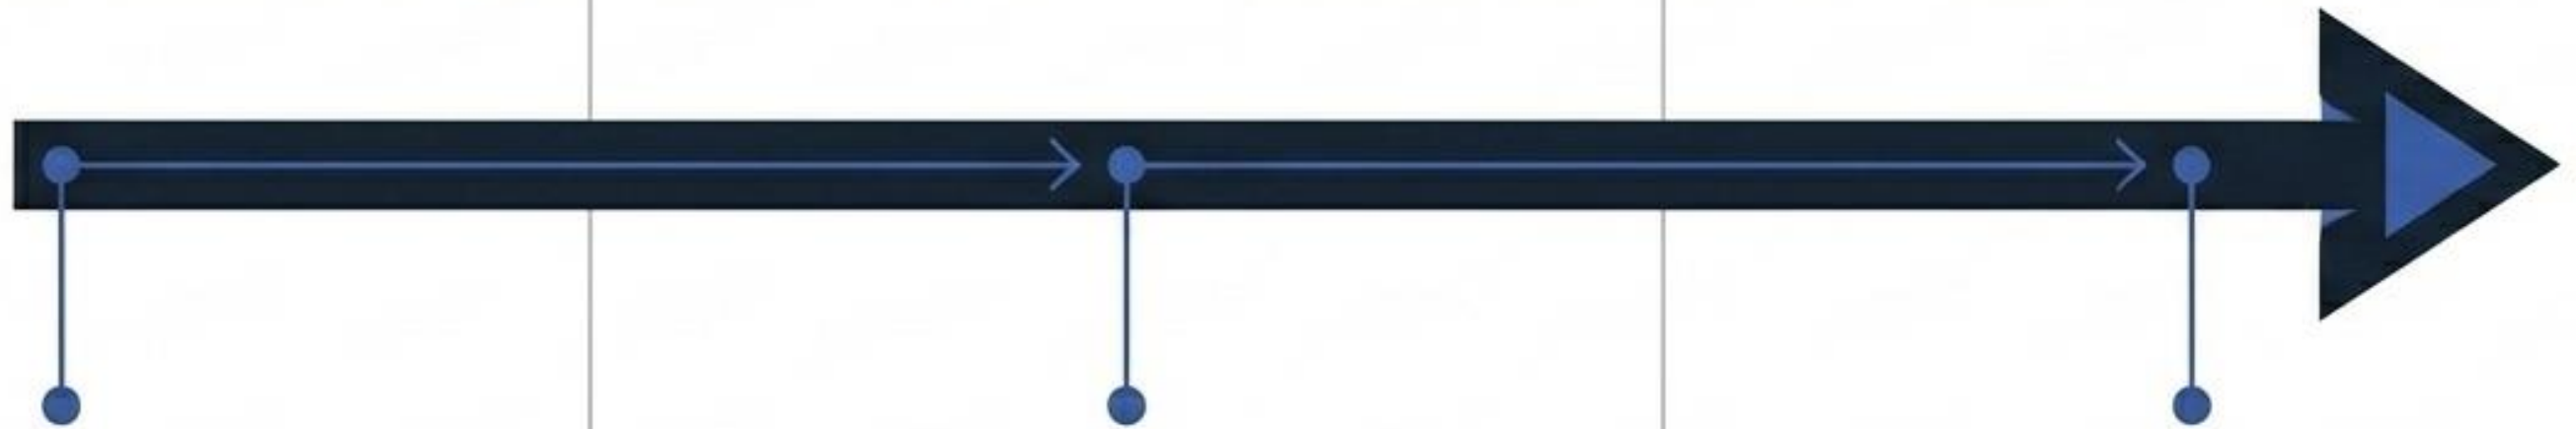

Designed for Developers, Product Strategists, and Accessibility Advocates

Power, Privacy, and Accessibility

A schematic overview of the foundational pillars and the central convergence.

The Local Engine Pipeline

The Brain

Ollama running qwen3.5:9b locally on Port 11434.

```
ollama pull qwen3.5:9b
```

The Backend

Python 3.10+ and FastAPI handling logic on Port 8000.

```
pip install -r requirements.txt
python main.py
```

The Frontend

Node.js and React/Vite powering the UI on Port 5173.

```
npm install
npm run dev
```

Designed for Clarity

High-Contrast Palette

Pure White

Deep Charcoal

Cobalt Blue

Reduces eye strain while maintaining a modern feel.

Scaled Typography

Aa Aa Aa Aa

Engineered specifically for the visual needs of older adults.

Intuitive Navigation:

Complex controls simplified into 9 clear, accessible tabs.

Autonomous Local Engineering

Sandboxed Terminal Execution

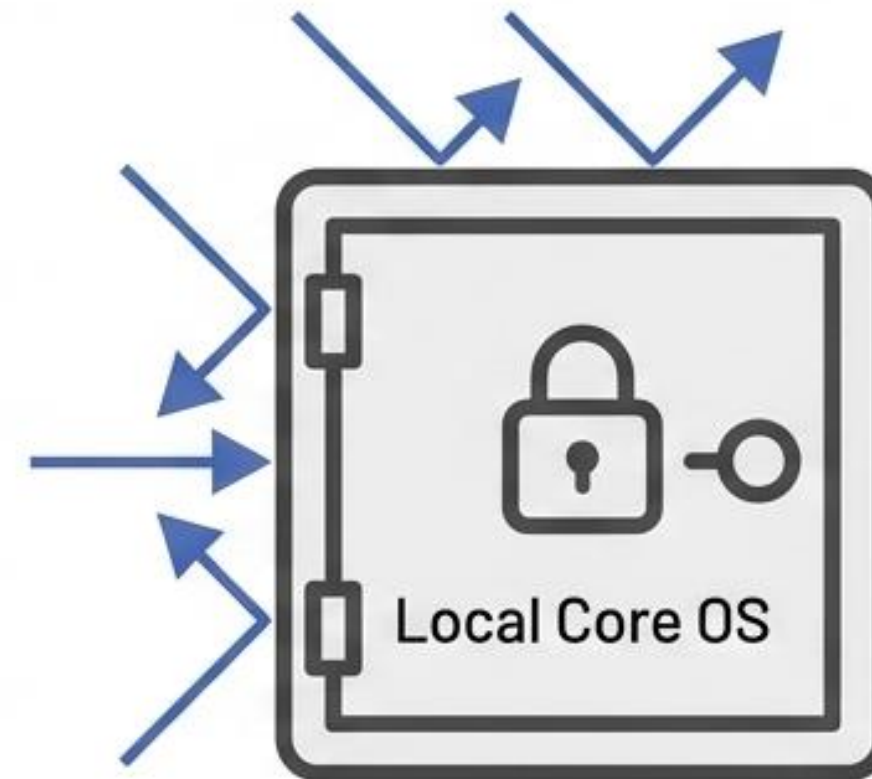

Dynamic Actions

Agent requests permission
to execute: `npm install`

Allow Execution? [Y / N]

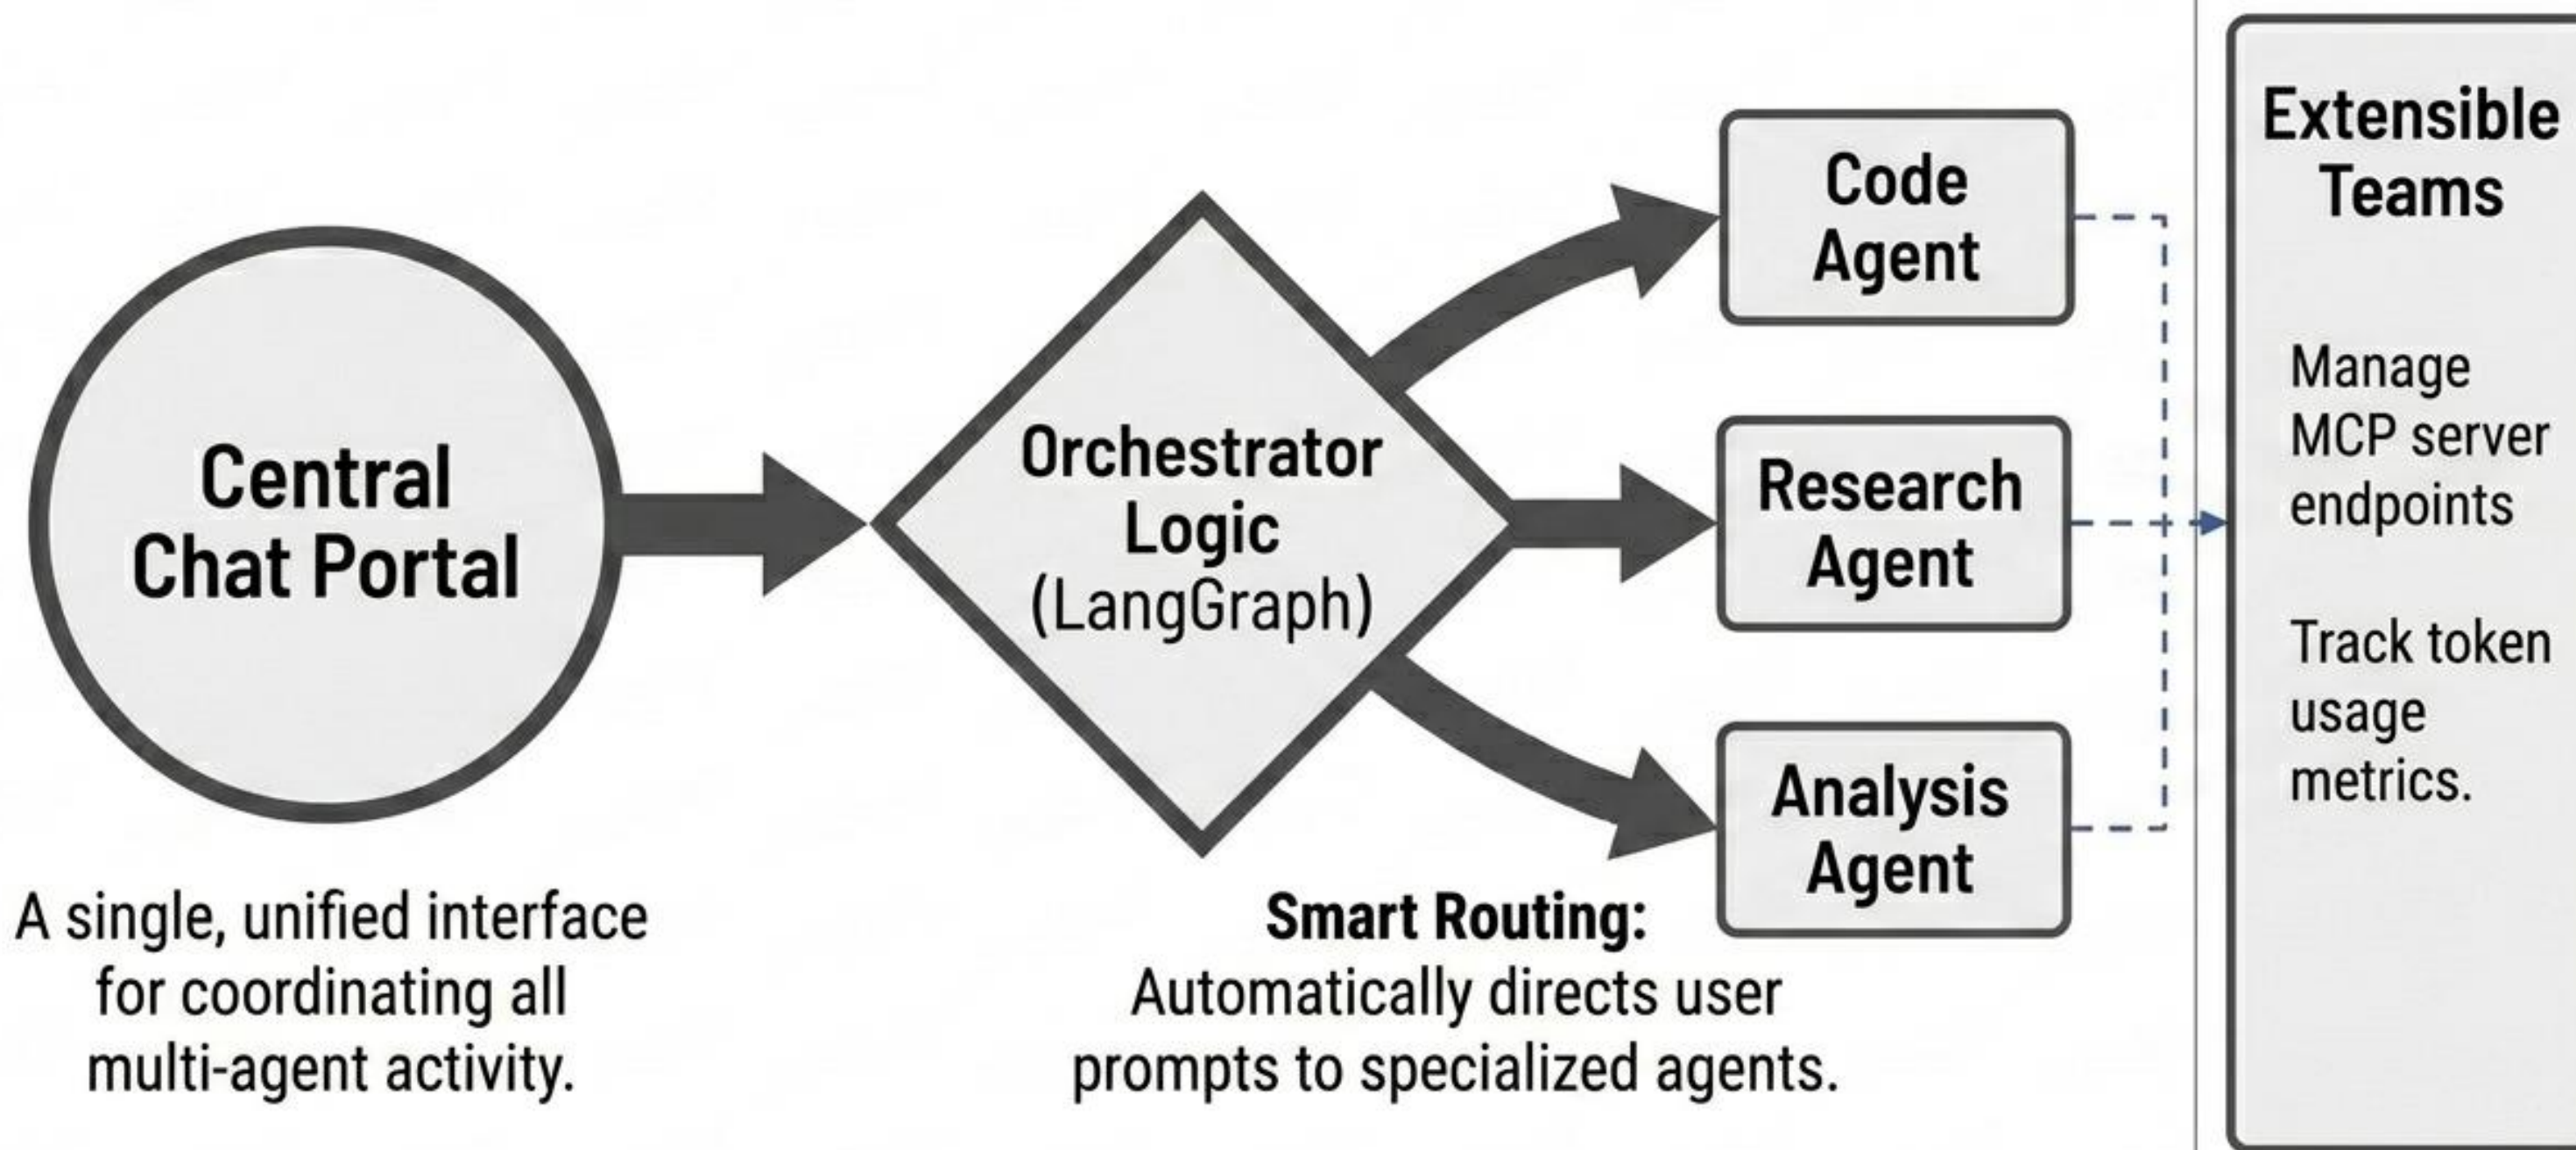

Terminal commands require explicit
user permission before any script runs.

Safety Sandbox

Complete user control over what the
agent can and cannot execute.

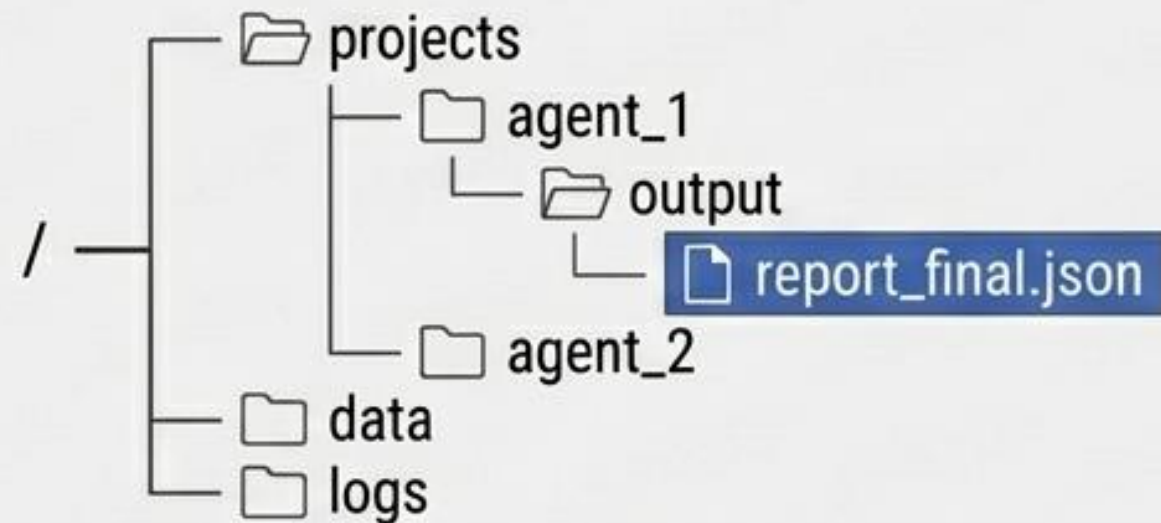

The Multi-Agent Command Center

Persistent Workspaces and Background Loops

Visual Directory

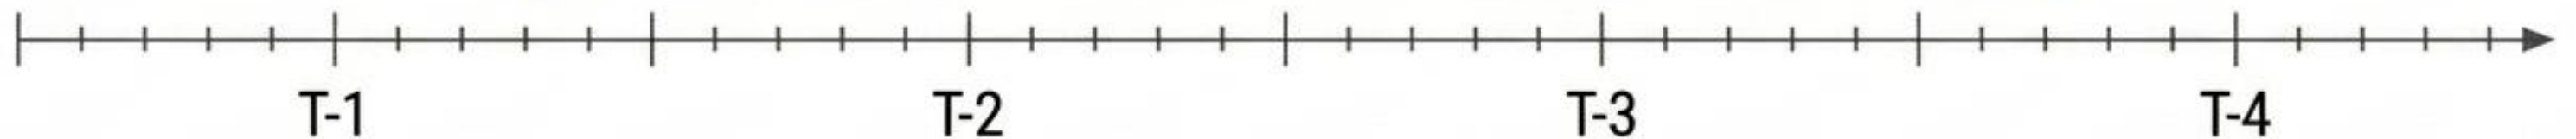

SPACE

Browse, inspect, and open files generated by agents directly within whitelisted paths.

TIME

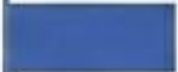

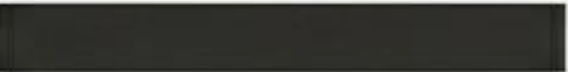

Check product availability - every 1 hr

Recurring Autonomy: Set up background timers for agents to run tasks without intervention.

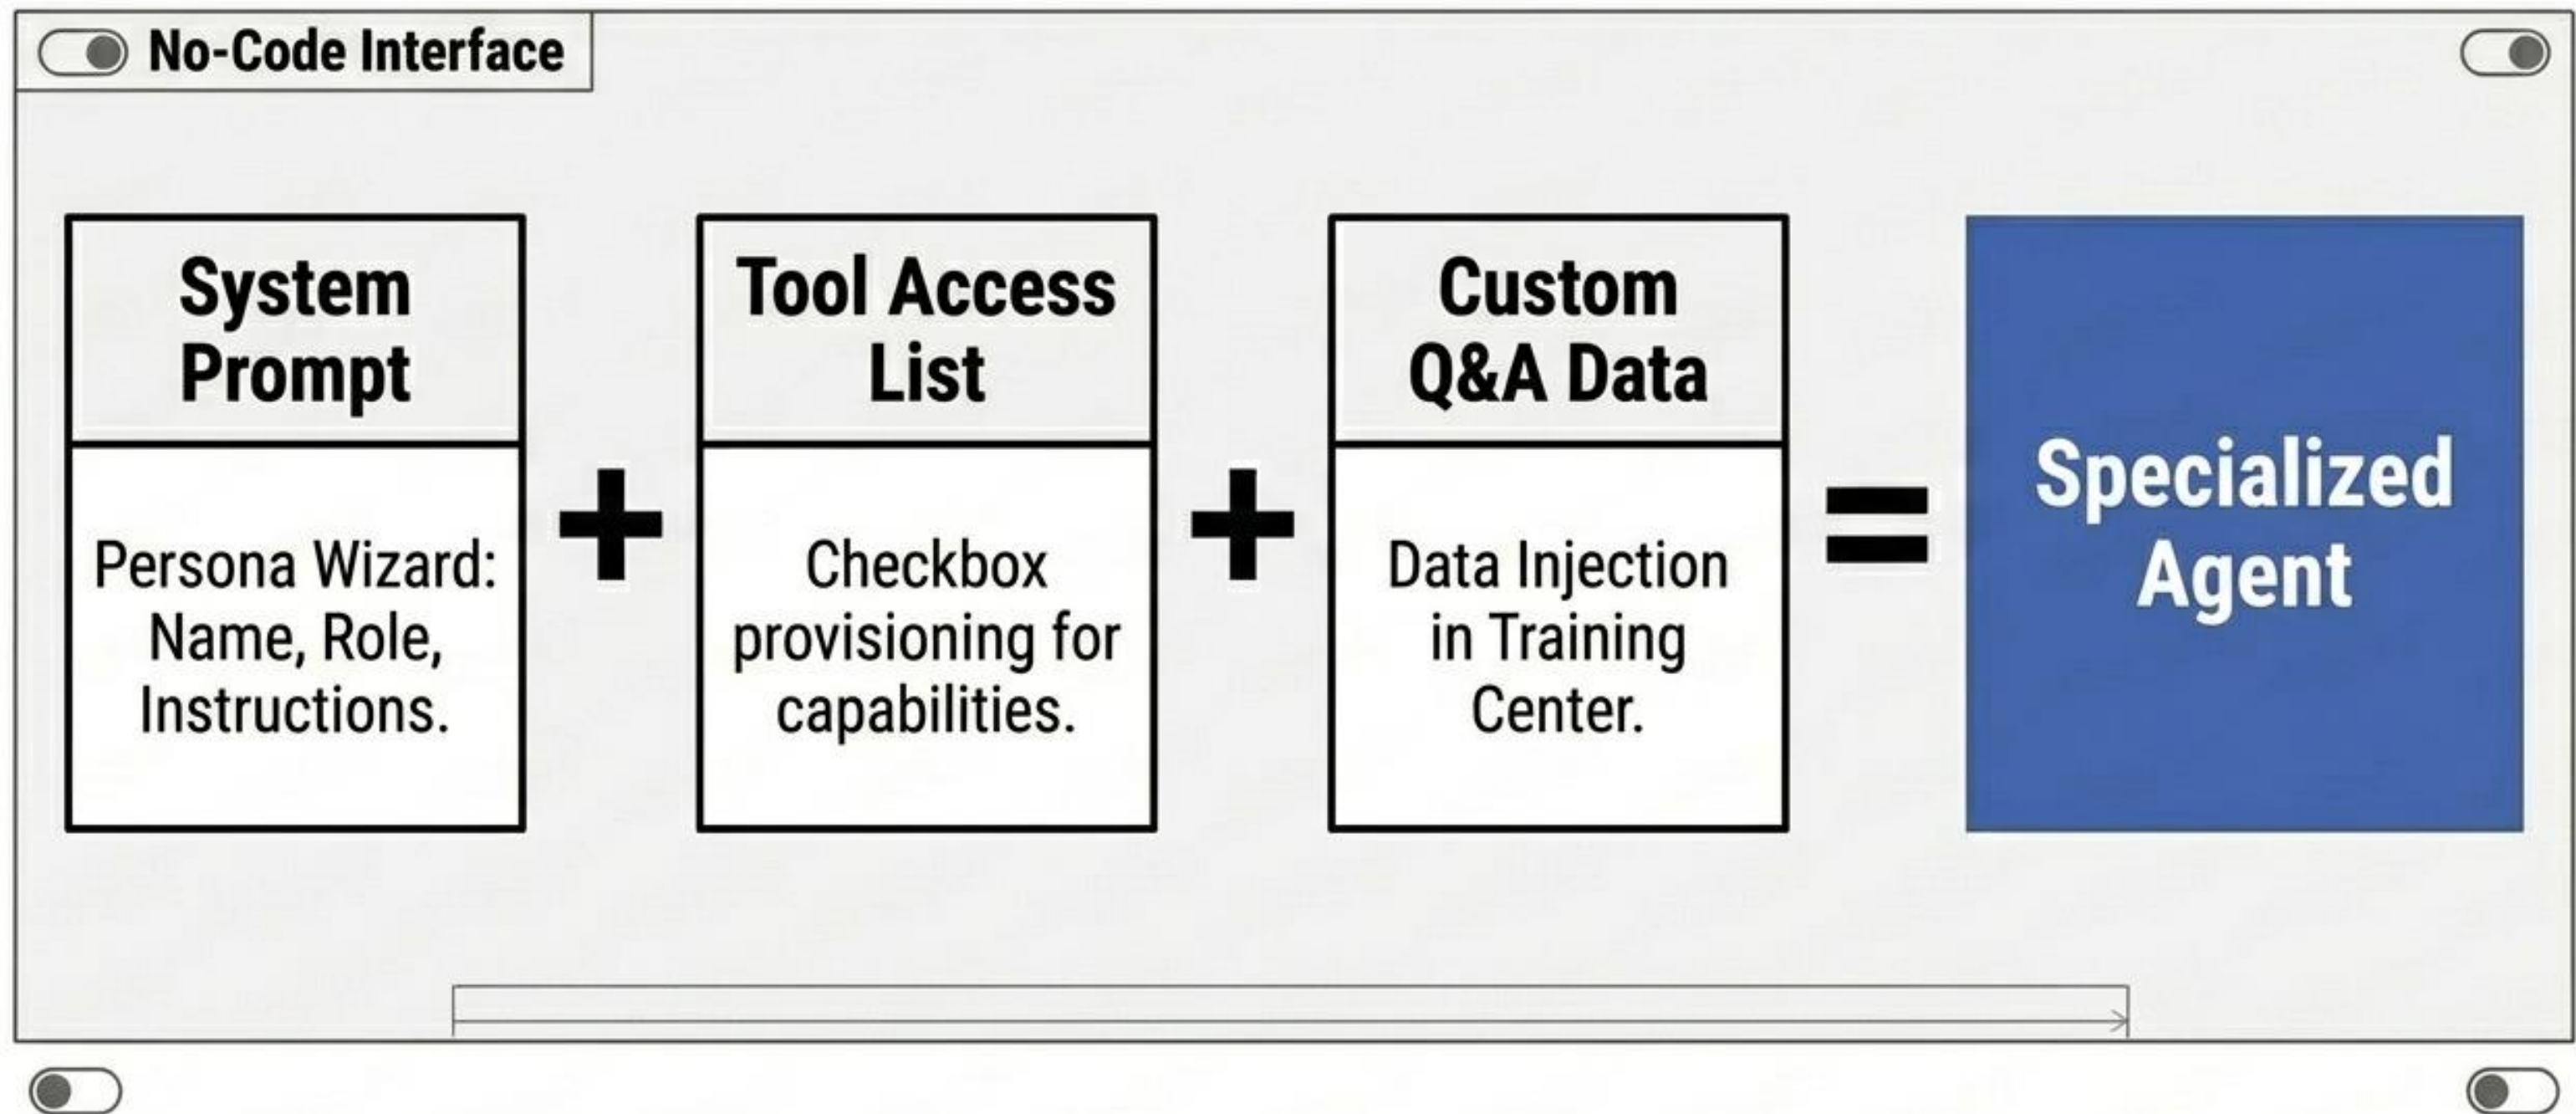

Agent Arena Performance Matrix

Side-by-Side Sandbox: Run identical prompts against different agents simultaneously.

Metric	Agent A (Code Agent)	Agent B (Analysis Agent)
Time-to-First-Token (TTFT)	120ms 	450ms 
Total Latency	1.4s	3.2s
Historical Global Leaderboard Rank	#1 - Highly Efficient	#4 - Standard Pacing

Monitor and rank agents dynamically based on latency and processing speeds across all calls.

No-Code Customization and Fine-Tuning

Security First Configurations

Granular Control: A dedicated dashboard tailored to protect older users while maintaining operational freedom.

Auto-Run Configs:

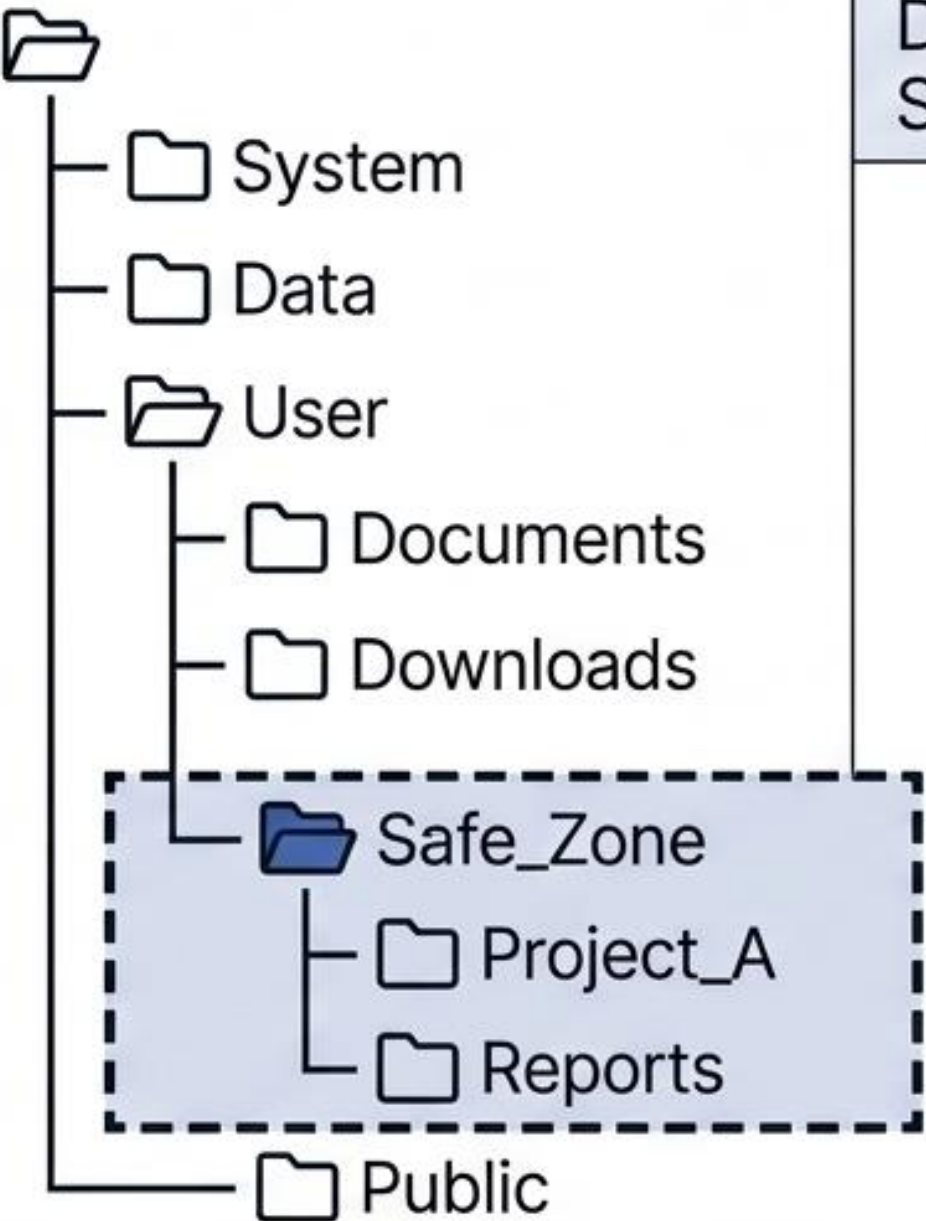

Auto-run npm install: OFF

Auto-run python scripts: ON

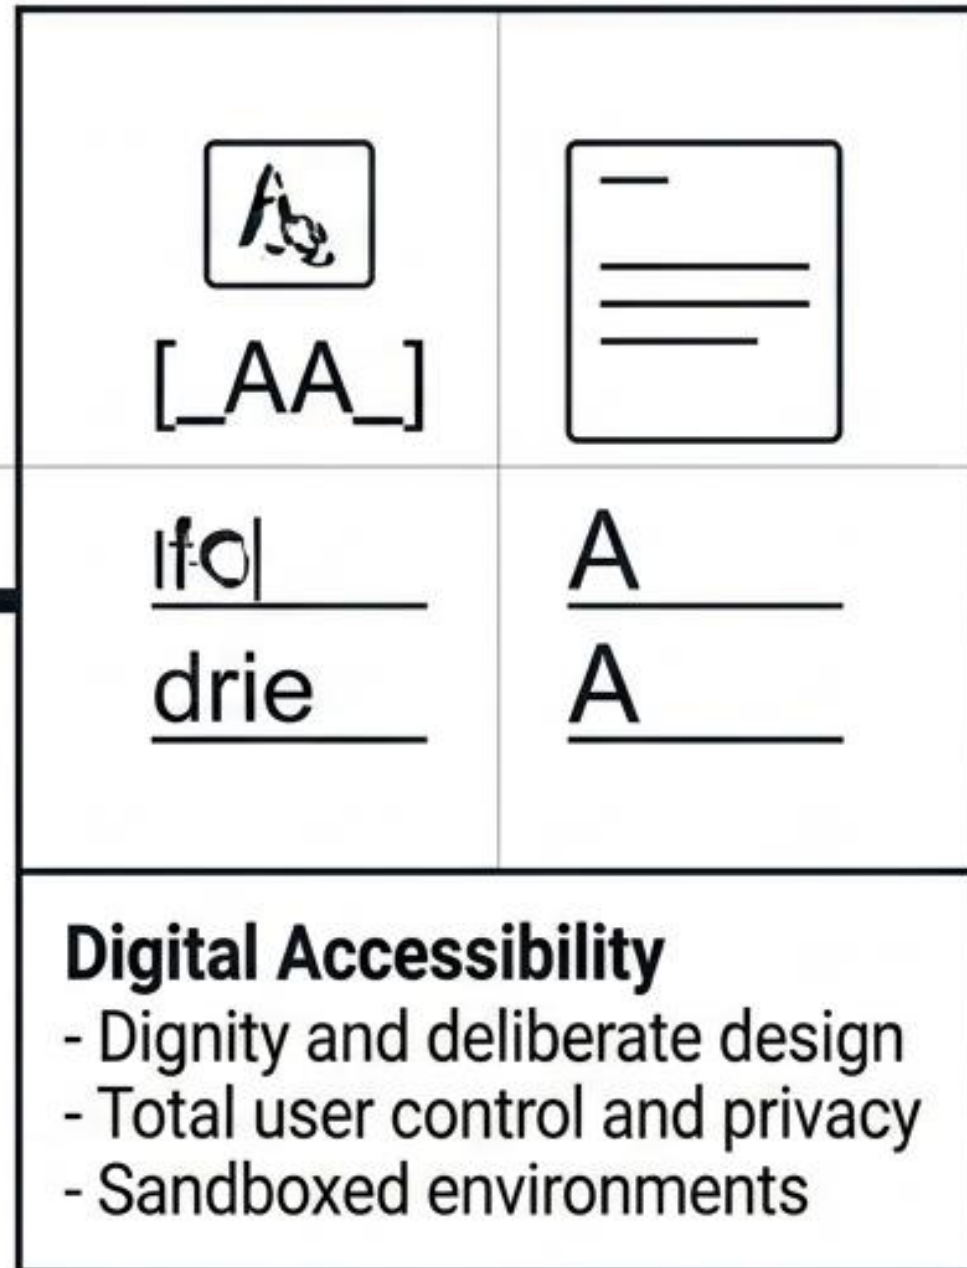

Auto-Run Configs: Whitelist specific, non-destructive terminal commands.

Designated Safe Path

Directory Whitelisting: Strictly limit agent filesystem access to user-defined safe isolated folders.

The Future of Accessible Autonomy

SeniorAgent
